Hobart Marsh Area Plan

Currently there are 355 acres slated for wetland mitigation in the western boundary of Hobart. The wetland mitigation will happen on property owned by the Indiana Department of Natural Resources and the Army Corps of Engineers will be in charge of the mitigation efforts. The City of Hobart's Robinson Lake and Lake County's bike trail are in the same area. The surrounding area is lightly developed residential, farm fields, and a former banquet hall. The City of Hobart would like to create a planning document with strategies for implementing. The plan addresses the many questions that exist in this area, such as, interpretive signage, connectivity, access, facilities, preferred uses, incompatible uses, recommended improvements, infrastructure, marketing, target audience, environmentally sensitive areas, evaluate existing ordinances, and strategies for implementation.

RESULT: A plan for Hobart Marsh Area
